CAMO®

CAMO Drive Earns First Place at LMC Annual Meeting

National Nail's CAMO Drive earned first place in the New Products Showcase at LMC's 84th Annual Meeting in San Diego. The Lumbermens Merchandising Corporation (LMC), a national buying group of dealers, praised the CAMO Drive for its affordability, versatility, and efficiency.

The New Products Showcase at LMC's 84th Annual Meeting featured close to 100 products from more than 60 suppliers.

Engineered with insights from decking pros, the CAMO Drive tool was designed to overcome key challenges faced by today's professional deck builder. It gets contractors off their knees and in a comfortable standing position and installs up to 5X faster than current methods. It attaches to the contractor's own drill with three end attachments for installing traditional face fasteners; CAMO's propriety Edge Screws or their new, revolutionary CAMO EdgeClip or EdgeXClip; both the Edge and Clips systems deliver a smooth, fastener-free surface.
