National Nail has introduced the newly-enhanced Stinger CN100B Cap Nailer.

The newly-enhanced Stinger CN100B Cap Nailer in action.

The latest Stinger features an innovative design that improves performance with an improved cap magazine for added durability.

The original CN100 is a recognized leader in time-saving roofing tools and part of the GAF Hire a Hero training program for military veterans.

Lightweight at 4.9 lbs., Stinger's CN100B features effortless loading, upgraded tool life, and utilizes full, one-inch collated plastic caps; it is capable of firing 200 caps/200 nails before reloading. The Electro Galvanized ring shank nails are 1" X .083" full round head.

"Our upgrades are completely based on customer feedback—we listened to our contractors' needs to make several enhancements to the STINGER CN-

100B. It is now even more durable with an improved cap magazine with fewer reloads,” said Roger Szotko, Stinger product manager, National Nail. “The plastic caps are also ASTM tested for high wind and UV performance.”

The Stinger CN100B also includes an installed belt hook, trigger with bumpfire and sequential modes, and durable carrying case.

National Nail Corp., headquartered in Grand Rapids, Mich., is an employee-owned manufacturer and distributor of building products and service solutions for the residential and commercial construction industries.
