New STINGER CN100B Cap Nailer From National Nail Delivers Durability, Enhanced Design

National Nail, an industry-leading manufacturer of fastening tools for roofing underlayment and house wrap, introduces the newly-enhanced STINGER CN100B Cap Nailer with an innovative design that improves performance with an improved cap magazine for added durability. The original CN100 is a recognized leader in time-saving roofing tools and part of the GAF Hire a Hero training program for military veterans.

Lightweight at 4.9 lbs., STINGER's CN100B features effortless loading, up-graded tool life and uses full, one-inch collated plastic caps; it is capable of firing 200 caps/200 nails before reloading. The Electro Galvanized ring shank nails are 1" X .083" full round head.

"Our upgrades are completely based on customer feedback—we listened to our contractors' needs to make several enhancements to the STINGER CN-100B. It is now even more durable with an improved cap magazine with fewer reloads," said Roger Sotko, STINGER product manager, with National Nail. "The plastic caps are also ASTM tested for high wind and UV performance."

The STINGER CN100B also includes an installed belt hook, trigger with bumpfire and sequential modes and durable carrying case.
