Stinger NailPac approved by IBHS Fortified Home

NailPac meets the weather-proofing standards required of a Fortified Roof.

National Nail's Stinger brand has partnered with the Insurance Institute for Business & Home Safety's (IBHS) Fortified Home program, specifically highlighting the Stinger NailPac.

The NailPac (1" plastic collated caps and 1" x .083 stainless steel ring shank nails for securing underlayment) seals out moisture and provides superior holding power in up to 150 mph hurricane-force winds. Because of its performance, NailPac meets the standards required of a Fortified Roof—a level of protection in the Fortified Home program that ensures water will stay out of the house in the event of severe weather.

As a program, Fortified Home aims to protect and strengthen homes to reduce the risk of property damage and financial loss, and they do so by going beyond standard building codes.

“Contractors who build stronger, more resilient homes provide their homeowners with the best protection from high winds and heavy rains. We are excited to see manufacturers like National Nail respond to contractor needs and develop products like their Stinger NailPac to make building to the Fortified Roof standards easier than ever,” said Fred Malik, managing director of Fortified Products. “By providing Fortified-compliant, corrosion-resistant nails

and eliminating the hassle of hand-driving button-cap nails, roofers can more quickly deliver stronger roofs for homeowners.”

Stinger's CN100B Cap Nailer.

Stinger NailPac is designed for exclusive use with the Stinger CN100B Cap Nailer. The CN100B is an innovative and versatile pneumatic tool that was engineered to make securing underlayment easy. Each 2000 count NailPac—which includes ten reels of 200 1" plastic collated caps and 10 coils of 200 1" x .083 304 stainless steel ring shank nails—will cover approximately 25 square feet dependent on installation instructions and/or building code requirements. Stinger also offers the CS150B Cap Stapler and StaplePac (1" plastic collated caps and 5/8", 7/8", 1-1/4", and 1-1/2" 18ga staples) for installing housewrap and foam board.

“We are honored to be one of the select brands to partner with Fortified Home,” said Roger Szotko, Stinger product manager, National Nail. “The approval from Fortified Home confirms that NailPac makes the installation of roofing underlayment easy for contractors, and it ensures strong protection against the elements.”

HBSDdealer presented the [Stinger CN100B Cap Nailer](#) with 2019 Golden Hammer Award earlier this month.

The IBHS conducts objective, scientific research to identify and promote effective actions that strengthen homes, businesses and communities against natural disasters and other causes of loss.
