CAMO® and Fiberon partner to offer better ways to build beautiful outdoor living spaces

Grand Rapids, MI, 2/9/21 – CAMO, the brand dedicated to creating innovative deck fasteners and tools, and Fiberon, a leading manufacturer of low-maintenance decking, railing and cladding, are partnering to offer Fiberon EDGE®, EDGEX™ and STARTER Clips to Fiberon’s entire dealer network. The partnership brings together two trusted brands that put just as much value in the builder’s experience as they do the finished result. Together, CAMO and Fiberon offer the most comprehensive fastening system in the composite decking industry, providing versatile solutions for Fiberon grooved deck boards. EDGE, EDGEX and STARTER Clips are engineered to offer contractors a better installation experience increasing speed and efficiency.

“We are excited to partner our leading CAMO EDGE Clip fastening technology with the award-winning Fiberon decking products,” said W. Scott Baker, CEO of National Nail. “The combination of our two brands will provide an unparalleled installation and outdoor living experience for installers and homeowners alike.”

“Fiberon prides itself on supporting its customers with the best decking products in the industry,” said Chris Hayn, vice president of sales at Fiberon. “We’re thrilled to enhance our installation experience by adding the latest hidden grooved fastener innovations from an industry leader like CAMO.”

EDGE, EDGEX and STARTER Clips are all warranted for use with Fiberon grooved deck boards. Both EDGE and EDGEX Clips eliminate the need for partial installation. EDGE Clips (90-degree deck patterns) hug the joist, and EDGEX Clips (any deck pattern) fit in the board groove, allowing contractors to set multiple rows of boards and clips in place before fastening with the NEVER-MISS™ Guide included in every pail. STARTER Clips offer a fastener-free deck surface that is easy to install. For an even better experience with five times faster installation, contractors can use CAMO LEVER® board bending and locking tools and stand-up CAMO DRIVE™ tool, both available through Fiberon distribution partners.
